
Boost Your Profit with Forsec Active ID-EAS System

Forsec ID represents the new generation of Active ID-EAS (Identified Electronic Article Surveillance) system's for shops and retail department stores. This means that you can upgrade your existing passive EAS system with the new Active ID-tag technology and get possibility for Forsec Management Control system over internet.

What that means to you is that Forsec alarm system stops even the best professional shoplifters who use all the tricks and tools of the trade. Forsec customers have reported zero theft of tagged articles, resulting in an increased profit.

Advancement in the latest technology means greater security higher profit

Most of the technology that current passive EAS systems are based on is over 50 years old, so the average thief knows numerous ways to quickly and easily bypass them. With the Forsec alarm system we have replaced all old magnetic and mechanical detachers for the tag locks with a new electronic digital code activated detacher.

Forsec ID-tags sound the alarm if thieves using every trick in the book. And at the same time send its tag ID to the receiver within 50 meter. The digital code is uniquely programmed for each individual store, which means that a detacher from one store cannot open an alarm tag in any other store.

THE TAG

Since its launch in 2010, Forsec system successfully prevented shrinkages at many installations throughout Europe and Asia. In many of the leading high brands stores as

Longchamp, Louis Vuitton, Gucci, L'Éclair
clair, Lancaster
Colette, Isabel Marant
Yves Salomon / Révillon, Mulberry's
Oddmolly, MQ Sweden, Lanvin, Chanel,
Bottega Veneta, Prada, Ferragamo.
B & B Tools, Ahlsell, Optimera
Beijer Building Supplies
